The Sling Rail  
Left To Right

### BACK WIDTH

From Center Of  
The Sling Rail  
Left To Right

### DEPTH

From Front Of  
The Sling Rail  
To The Back

## **New Replacement Slings for A 2 Piece Patio Chair Requires 6 Measurements.**

Most of the time, the top width and bottom width measurements will be the same. However, some two piece chairs may have a taper to the seat where the front is wider than the back.

On width measurements, measure from the center of the sling rail to the center of the sling rail on the other side.

Do not add to this measurement -  
We account for the fabric inside of the rails as well as the hems

Round UP to the nearest 1/4"

Do not measure the old sling that is not installed in the frame.  
This is not an accurate measurement.
